1 CONTROLLING THE ROBOT

1.1 Tasks:

1. Set the directions of used pins for controlling the motors.
2. Write a simple program that follows next sequence:
    1. move the robot forward,
    2. do it for 3000 ms,
    3. and stop the robot.

1.2 Questions:

You probably ended up with this solution … Right?

Program 1: Move the robot forward.

```
void setup() {
 pinMode(4, OUTPUT);
 pinMode(5, OUTPUT);
 pinMode(6, OUTPUT);
 pinMode(7, OUTPUT);

 digitalWrite(7, HIGH);
 digitalWrite(6, LOW);
 digitalWrite(5, HIGH);
 digitalWrite(4, LOW);

  delay(3000);

  digitalWrite(7, LOW);
 digitalWrite(6, LOW);
 digitalWrite(5, LOW);
 digitalWrite(4, LOW);
}

void loop() {
}
```

1. Is your code “easy readable” and
2. Why is this important?
